## How to Use Auto Trails Maps

ROUTES shown in the Map, viz: —69— indicate marked automobile roads. The numbers in the squares refer to the corresponding numbers in the map key, where descriptions of the road signs painted on the poles will be found. Follow these signs to your destination.

In larger cities, where entrances and exits are confusing, and often there are no trail signs, you will find on the city maps in this guide what streets to use in order to follow a given trail through the city.
